PROFESSIONAL SUMMARY

Python Full Stack Developer and GenAI/LLM Engineer with 2+ years of experience architecting scalable web and mobile applications and production AI systems using Django, FastAPI, ReactJS, React Native, LangChain, and LangGraph. Hands-on experience building Retrieval-Augmented Generation (RAG) pipelines, agentic AI workflows, and multi-tenant SaaS architectures, with a track record of reducing manual processes by 60%+ through AI-driven automation. Skilled in end-to-end delivery in Agile environments — from REST API and backend design to LLM-powered chatbot deployment — with additional training in Model Context Protocol (MCP), computer vision, and NLP.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL, HTML, CSS

Backend & Full-Stack Development: Django, FastAPI, Spring Boot, REST API Development, React, React Native, Redux

Generative AI / LLM Engineering: LangChain, LangGraph, Model Context Protocol (MCP), OpenAI API, Groq LLM, Retrieval-Augmented Generation (RAG), Vector Databases (FAISS, ChromaDB), Prompt Engineering, Agentic AI Workflows, Large Language Models (LLM)

Data Science & Machine Learning: NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, Matplotlib, Seaborn

Cloud & DevOps: AWS (Exposure), Docker, Git

Tools & Collaboration: Slack API, GitHub API, Figma, Streamlit, Agile/Scrum

PROFESSIONAL EXPERIENCE

Python Full Stack Developer

Jan 2025 – Present

Wexdi Software Services (Remote)

- Architected and deployed a multi-tenant SaaS architecture for the Birthplace Platform, enabling dynamic routing and scalable service delivery across multiple village-specific portals (Schools, Hospitals, and more).
- Designed and deployed an AI-powered conversational chatbot (GenAI/LLM-based) using FastAPI, LangChain, LangGraph, and Groq/OpenAI LLMs, implementing session-based memory, intent classification, and agentic workflows to automate village-level support.
- Implemented secure OTP-based authentication and multi-tenant registration flows in React Native CLI mobile applications, strengthening user onboarding and tenant-level data isolation.
- Built an automated Slack AI Content Generator and GitHub Ticket Manager using FastAPI, LLMs, and REST API integrations (Slack API, GitHub API), streamlining internal developer workflows and reducing manual ticket triage.
- Reduced manual appointment scheduling effort by 60%+ by designing an AI-driven Booking Bot with automated slot management and real-time update handling.

Junior Java Developer

July 2024 – Dec 2024

HulkHire Tech (Remote)

- Integrated Stripe Payment Gateway into UK-based e-commerce platforms using Java and Spring Boot, enabling secure end-to-end payment processing.
- Designed and developed RESTful APIs for payment workflows, collaborating cross-functionally with frontend teams (Axios integration) for seamless, low-latency transactions.
- Contributed to Agile/Scrum ceremonies — sprint planning, stand-ups, and code reviews — with deployments to AWS infrastructure.

KEY PROJECTS

- Birthplace Platform — Python, Django, React, React Native: Multi-tenant web and mobile SaaS platform delivering village-specific portals (Schools, Hospitals, community services) with tiered premium/non-premium access and role-based routing.
- Booking Bot — AI/Automation: AI-powered appointment scheduling system that reduced manual intervention by 60%+ through automated slot management and real-time updates.

- ITFIC Solution — Django, SQLite: Role-based Employee Management System with secure authentication, role-based access control (RBAC), and attendance tracking.

CERTIFICATIONS & PROFESSIONAL TRAINING

Complete Agentic AI Bootcamp with LangGraph and LangChain

Instructor: Krish Naik

Topics: AI Agents, LangChain, LangGraph, Multi-Agent Systems, RAG, Tool Calling, Memory, Agent Workflows

Complete MCP Bootcamp: Build Next-Gen AI Agents with MCP

Instructor: Krish Naik

Topics: Model Context Protocol (MCP), MCP Servers, MCP Clients, AI Agent Integration, Tool Integration

Complete Computer Vision Bootcamp with PyTorch & TensorFlow

Instructor: Krish Naik

Topics: Computer Vision, OpenCV, CNN, Image Classification, Object Detection, PyTorch, TensorFlow

Natural Language Processing (NLP)

Instructor: Tutedude

Topics: NLP Fundamentals, Text Processing, Tokenization, Embeddings, Text Classification, Sentiment Analysis, Named Entity Recognition, Transformers

EDUCATION & LANGUAGES

B.Tech in Computer Science and Engineering

2019 – 2023

Parul University, Gujarat

Languages: English, Hindi, Telugu, Odia
